

DMX SPI

Converts DMX to SPI

ESSENTIAL DMX-TO-SPI PIXEL DRIVER

The DMX SPI is a compact and reliable DMX-to-SPI converter designed for effortless integration into any LED installation. It transforms standard DMX512 signals into SPI pixel data with precision, driving up to 170 RGB or 128 RGBW pixels just like a traditional LED driver. Its small footprint, broad SPI compatibility, and professional-grade performance make it the ideal choice for LED strips, and creative lighting projects.
